

## NATURAL® MOISTURIZING LOTION

The vegan Moisturizing Lotion provides skin with natural care and new vitality. The **intensive active ingredient complex made of natural argan oil and walnut extract provides plenty of moisture and long-lasting protection against dry skin.** Natural antioxidants act as a shield for the skin, combating free radicals and repairing skin damage. The building of a hydro-lipid film **reduces wrinkles while considerably enhancing your skin's tonicity.** Aloe vera has a soothing effect and regenerates sensitive skin. The Moisturizing Lotion ensures completely healthy, vital skin, with no animal ingredients, parabens, or paraffins.

## NATURAL® UV-PREPARATION LOTION

The vegan UV-Preparation Lotion prepares your skin for sunbathing in a natural way thanks to high-quality argan oil. **The linoleic acid it contains acts as a protective barrier against damaging environmental influences while protecting the skin against drying out.** Skin cell metabolism is activated and moisture storage increased. At the same time, the amino acid tyrosine intensifies the skin's natural tanning process in the sun or in the solarium. **The production of the tanning pigment melanin is reinforced and thus accelerates the tanning result, meaning that your skin requires significantly less exposure to UV rays.** Natural walnut extract enhances your tan even more. The UV-Preparation Lotion gently ensures natural and beautifully tanned skin.

## NATURAL® BRONZING LOTION

The vegan Bronzing Lotion combines a naturally beautiful tan with all-round natural and healthy-looking skin. The exclusive combination of natural argan oil and walnut extract provides the optimal skincare basis for a uniform tan. **The skin is intensely moisturised and given long-lasting protection against drying out.** Natural antioxidants protect it against free radicals and maintain its vitality and tonicity. In addition, sugar-based self-tanners react with the top layer of skin, ensuring a tan that lasts for up to a week without any exposure to UV rays. **Natural walnut extract also supports this reaction and makes the tan look even more intense.** The Bronzing Lotion provides a naturally tanned complexion – with no animal ingredients, parabens or paraffins.

**NATURAL<sup>®</sup> – NATURAL SKINCARE!**

## TANNYMAXX<sup>®</sup> NATURAL<sup>®</sup>: Natural – free – beautiful!

For the love of skin and nature, Tannymaxx has developed its first vegan skincare line with **NATURAL**. Tannymaxx has always preferred product development that avoids animal testing. Now, for the first time, we are offering a product with no animal ingredients or parabens. Instead, the combination of 100% natural argan oil and walnut extract provides the skin with an exclusive care cocktail. The slightly floral fragrance is reminiscent of the woody nuances of a fresh spring meadow. A MUST-HAVE for all nature lovers!

**Tannymaxx NATURAL – natural skincare!**

### ACTIVE INGREDIENT: ARGAN OIL

Argan oil – also known as the “**Gold of Morocco**” – is one of the most valuable plant oils in the world. This is due to the complicated process of extracting the oil and its valuable ingredients. Argan oil consists of about 80% unsaturated fatty acids, which play a crucial role for the skin cells. As one of the most useful unsaturated fatty acids, linoleic acid gives skin elasticity and vitality while preventing it from drying out.

Argan oil is also rich in natural antioxidants that protect against harmful effects while neutralising skin damage caused by free radicals. The production of healthy skin cells is stimulated and the tonicity of the skin is preserved.
